

FINANCIAL AID & SCHOLARSHIPS

At Los Angeles City College, we believe that the cost of education should not prevent a person from attending college. Education is the single most important investment a person will make in a lifetime.

College graduates have more earning power than those without a college degree. This makes it possible for college graduates to have more control over their life and increase their status in the society.

LACC participates in various federal and state financial assistance programs to help students pay for college expenses. This site contains valuable information to assist both prospective and current students with the financial aid application process.

As the LACC Korean Studies Program Director, I welcome you to take the opportunity to major in a one of a kind program in the state, Korean Studies AA Degree. You will not only learn to speak, read, and write Korean at a functional level, you will also learn about Korean history and culture. After completing the degree, you can transfer to a 4 year college to further pursue your studies. However, most importantly, you can start communicating with 180,000 Koreans in the Los Angeles County. No other community college in California has a Korean studies program that is as extensive ours. LACC Korean Studies Program's mission is to be the best community college Korean studies program in the nation.

MICKEY HONG, C.PHIL.
