

# CONTENTS

<b>Preface</b>	<b>xiii</b>
<b>1. The Study of Economics</b>	<b>1</b>
Why Study Economics?	
Value Judgments	
Fallacies	
False Cause	
Composition	
Division	
Methodology in Economics	
Inductive Reasoning	
Deductive Reasoning	
Facts, Theories, and Policies	
Normative Economics	
Positive Economics	
Monetary and Fiscal Policies	
Inflation and Recession	
<i>Issues</i>	
Why Economists Disagree	
<b>2. Scarcity and Choices</b>	<b>19</b>
The Factors of Production	
Consumer, Capital, and Social Goods	
Opportunity Cost	
The Production Function	
A Three-Dimensional Approach	
The Production Possibilities or Transformation Curve	
<i>Issues</i>	
The Arms Race	
<b>3. Markets and Government</b>	<b>31</b>
Mercantilism	
Physiocrats	
Emergence of Capitalism	
The Profit Motive	
Market System	
Classical Economics	
The Circular or Double Flow of Income	
Markets and Goals	
<i>Issues</i>	
Professor of Auzanomics	

<b>4. Supply and Demand</b>	<b>41</b>
The Law of Demand	
Non-Price Factors of Demand	
The Law of Supply	
Non-Price Factors of Supply	
Equilibrium: Short and Long-Run	
<i>Issues</i>	
A Different Story: Not Long Ago, It Was Too Much Petroleum That Upset Oil Firms	
<b>5. Elasticity of Demand and Supply</b>	<b>61</b>
Price Elasticity of Demand	
Income Elasticity	
Elasticity and Total Revenue	
Marketing Personal Computers	
Declining Elasticity	
Curvature and Elasticity	
Elasticity of Supply	
A Calculus Example	
Elasticity Applications	
Marketing	
Water Supply	
Devaluation	
OPEC	
Deregulation	
The Minimum Wage Law	
The Coca-Cola Case	
Demand and Supply Models	
Price Ceilings and Shortages	
Price Floors and Surpluses	
Rent Control	
Sales and Taxes	
<i>Issues</i>	
Los Angeles: World's Sports Capital	
<b>6. Consumers and Utility</b>	<b>86</b>
Early Consumer Theory	
Income Effect	
Substitution Effect	
Total and Marginal Utility	
Diminishing Marginal Utility	
Mathematical Expression	
<i>Issues</i>	
Towards Consumer Rationality	
<b>7. Supply and Costs</b>	<b>97</b>
Types of Business Firms	
Sole Proprietorship	
Partnership	
Corporation	
The Law of Diminishing Marginal Returns	
Different Types of Costs	
Opportunity Cost	
Explicit Costs	

Implicit Costs  
 Fixed, Variable, Total and Marginal  
 Economies and Diseconomies of Scale

*Issues*

Cost-Benefit Analysis

**8. Perfect Competition** **117**

Characteristics  
 The Firm and the Industry  
 Short Run: Total and Marginal Analysis  
     Close Down, Loss Minimization and Profit Maximization Cases  
 Long Run Firm and Industry Equilibrium  
 Productive and Allocative Efficiency  
 Market Failures  
 Microeconomic Market Models

*Issues*

Marginal Analysis

**9. Monopoly** **146**

Characteristics  
 Demand and Revenue  
 Profit Maximization  
 Misconceptions about Monopolies  
 Price Discrimination  
 Antitrust Policies  
 Antitrust Cases  
     The Standard Oil Case (1911)  
     The Steel Case (1920)  
     The Alcoa Case (1945)  
     The Cigarette Case (1946)  
     The IBM Case (1982)  
     The AT&T Case (1982)  
     The MIT Case (1992)  
     The Microsoft Case (1995)  
 Monopoly Price Regulations  
 Deregulation

*Issues*

Retail Sales and Monopoly

**10. Imperfect Competition** **169**

Characteristics  
 Product Differentiation  
 Mark-up Prices and Economic Theory  
 Short Run  
     Profit Maximizing  
     Loss Minimizing  
 Long Run  
     Equilibrium  
 Advertising  
     Subliminal  
 Evaluation

*Issues*

Monopolistic Competition

<b>11. Oligopoly</b>	<b>185</b>
Characteristics	
Mergers: Vertical and Horizontal	
Case Study: Merger Mania	
Types of Oligopoly	
Price Leadership	
The Cartel	
Cost-Plus Pricing	
Competition and the Kinked Demand Curve	
Game Theory	
Evaluation	
<i>Issues</i>	
The Honda Approach	
<b>12. Macroeconomics: The Gross National Product</b>	<b>206</b>
GNP as Expenditure and as Income	
Investment and GNP	
Another View of the Income Approach	
The Flow Model	
Gross Domestic Product	
Limitations of the GNP	
The Price Index	
The GNP Deflator	
<i>Issues</i>	
Speculation in the Stock Market	
<b>13. Economic Fluctuations</b>	<b>228</b>
Macroeconomic Objectives	
American Economic Fluctuations	
Types of Inflation	
Demand Pull	
Cost Push	
Hyperinflation	
Types of Unemployment	
Cyclical	
Structural	
Frictional	
The Objective of Full Employment	
Economic Survey of the U.S.	
The 1930 Depression	
The Phillips Curve	
Stagflation	
Supply Side Economics	
The Twin Deficits	
<i>Issues</i>	
Case Study: Japan	

<b>14. Classical and Keynesian Economics</b>	<b>259</b>
Macroeconomic Stability	
Employment Act of 1946	
Full Employment and Balanced Growth Act of 1978	
Classical Economics	
Say's Law	
Keynes and the Great Depression	
Consumption and Saving Functions	
Marginal Propensity to Consume	
Marginal Propensity to Save	
Macroeconomic Equilibrium	
Recessionary Gap	
Inflationary Gap	
The Multiplier	
<i>Issues</i>	
The Keynesian Model	
<i>Appendix</i>	
Keynesian Aggregate Demand	
Aggregate Supply	
Demand Pull Inflation	
Cost Push Inflation	
Growth without Inflation	
<b>15. Fiscal Policy</b>	<b>294</b>
Demand-Side Fiscal Policies	
Government Spending	
Leakages and Injections Approach	
Taxes	
Transfer Payments	
Balanced Budget Multiplier	
Automatic Stabilizers	
Supply Side Fiscal Policies	
Reagan's Supply-Side Policies	
Tax Reductions	
Reduced Government Regulations	
Saving and Investment Incentives	
Fiscal Policy in Historical Perspective	
The Kennedy Tax Cut	
The Johnson Tax Surcharge	
Nixon's Wage and Price Controls	
The Reagan Deficits	
Budget Philosophies	
The National Debt	
Internationalization of the National Debt	
Case Study: Mexico's Peso Problem	
<i>Issues</i>	
Supply Side: Policy and Results	

<b>16. Money and the Banking System</b>	<b>320</b>
Functions of Money	
What Is Behind the Money Supply?	
Components of the Money Supply	
M1, M2 and M3	
Fractional Reserve Banking	
How Banks Expand the Money Supply	
Structure of the Federal Reserve System	
<i>Issues</i>	
E-Cash	
<b>17. Monetary Theory and Policy</b>	<b>344</b>
The Instruments of Monetary Policy	
The Keynesian Theory of Monetary Policy	
Monetarist Theory	
The Equation of Exchange	
Rational Expectations Theory and Policy	
Evaluation	
<i>Issues</i>	
Los Angeles: Financial Center of the West	
<b>18. The Evolution of Economic Thought</b>	<b>372</b>
Biblical Times	
Greek Economic Thought	
Plato	
Aristotle	
Roman Economic Thought	
The Middle Ages	
Scholasticism	
St. Thomas Aquinas	
Mercantilism	
The Physiocrats	
Francois Quesnay	
The Emergence of Capitalism	
The Profit Motive	
The Market System	
Classical Economics	
Adam Smith	
Thomas Robert Malthus	
David Ricardo	
Utopian Socialism	
Robert Owen	
Comte de Sainte Simon	
Charles Fourier	
Scientific Socialism	
Karl Marx	
Friedrich Engels	
Neoclassical Economics	
Alfred Marshall	
Leon Walras	

The Institutionalist Paradigm

Thorstein Veblen  
 Wesley C. Mitchell  
 John R. Commons  
 John K. Galbraith

The Keynesian Model

The Future of Capitalism

Joseph Schumpeter

Contemporary Economists

John Kenneth Galbraith  
 Milton Friedman  
 Paul Samuelson

**19. Foreign Trade 419**

The Law of Comparative Advantage

The Production Possibilities Curve

The Trade Possibilities Curve

Tariffs and Quotas

The Politics of Tariffs

Protectionism

The History of Tariffs in the United States

The World Trade Organization (WTO)

Economic Integration

Case Study: South Korea

*Issues*

A Higher Level of Economic Consciousness

**20. International Finance and Policy 435**

Balance of Payments

The Foreign Exchange Market

Arbitrage

The Exchange Rate and Its Implications

Fixed and Flexible Exchange Rates

History and Development of the International Monetary System

The Gold Standard

Managed Float System

The Trade Deficit: Policy Options

*Issues*

Less Developed Countries' Foreign Debt

**21. Global Issues 462**

Environmental Pollution

Water Pollution

Air Pollution

The Greenhouse Effect

Background

Economic Implications

Possible Solutions

Conclusion

The Amazon Jungle

Background Information

Economic Implications

Possible Solutions

Conclusion

- Acid Rain
  - The Canadian-American Interest
  - Economic Implications
  - U.S.-Canada Treaty on Acid Rain
  - Conclusion
- Agent Orange
  - Economic Implications
  - Economic Effects
  - Possible Solutions
  - Conclusion
- The Ozone Layer
  - Economic Implications
  - The Montreal Protocol
  - Possible Solutions
  - Conclusion
- North American Free Trade Agreement (NAFTA)
- Privatization
- U.S. Competitiveness
- Issues*
  - Pollution in Mexico City
