### **About the Academic Performance Index (API)**

The API is the center piece of the statewide accountability system in California public education. The Public Schools Accountability Act (PSA) of 1999, requires that the California Department of Education (CDE) annually calculate APIs for California public school and publish school rankings based on these indices. The PSAA also requires the establishment of a minimum five-percent annual API growth target for each school as well as an overall statewide API performance target for all schools. A school that meets either API growth or performance targets is eligible for rewards under the Governor's Performance Award Program. If a school fails to meet its annual growth target, it may be identified for the Immediate Intervention/Underperforming Schools Program (II/USP). Eventually, the API will incorporate a number of indicators; however, for 2003, the API will continue to consist solely of results from the Stanford 9 norm-referenced assessment that is administered in conjunction with the Standardized Testing and Reporting (STAR) Program.

#### **2003 API (Base)**

The 2003 API (Base) summarizes a school's performance in the 2003 STAR. It is on a scale of 200 to 1000. It is based on the performance of individual pupils on STAR content area tests as measured through national percentile rankings (NPRs).

#### **2003 Statewide Rank**

All schools that receive APIs are ranked in deciles by grade level of instruction: elementary, middle, and high. A rank of 10 is the highest and 1 is the lowest. Each decile, each school type contains 10% of all schools of that type.

#### **2003 Similar Schools Rank**

All schools are also ranked in deciles by school type when compared to schools with similar characteristics.

#### **School Mobility**

This is the percent of students who first attended this school in the current year.
