

Los Angeles City College Administrative Services "How To" Book	Information Technology Department	IV H-4
How Do I Obtain Network Information from the College?		

A. How Do I Know

How do I obtain Network information from the College?

1. Certain network information is available to the ATS or Information Technology staff only. Access to this information is restricted, and is protected by User ID and password. All requests for specific network information are to be made in writing to an ATS member or the Information Technology Manager who will then forward the request with a recommendation to the College administrator or Network Security Officer for evaluation. This information may include (but not limited to)
 - a. Router and Firewall configurations.
 - b. IP addresses.
 - c. Network performance information.
 - d. TP screen information.
 - e. User ID and password for specific network devices.
 - f. In all cases the Chief Information Officer (CIO) and/or the college president, or designee, will be notified of requests for network information that may compromise the security of the network. All information about the College/LACCD network is to be treated with the utmost confidentiality. Ref:
