

HEALTH OFFICER ORDER FOR THE CONTROL OF COVID-19

Public Health Emergency Quarantine Order

Revised Order Issued: October 26, 2020

This Order supersedes the July 23, 2020 Public Health Emergency Quarantine Order.

This Order is in effect until rescinded by the Health Officer.

WHO IS REQUIRED TO FOLLOW THIS HEALTH OFFICER ORDER

All individuals who reside in the Los Angeles County Health Jurisdiction who have been in close contact with a person who was diagnosed with COVID-19 based on a positive diagnostic (viral) COVID-19 test result are required to quarantine themselves and follow all instructions in this Order. This is because this exposure puts them at high risk for developing and spreading COVID-19.

WHAT YOU ARE REQUIRED TO DO IF YOU HAVE BEEN CLOSE CONTACT WITH A PERSON WHO HAS COVID-19

To prevent the spread of COVID-19, the County of Los Angeles Health Officer (“Health Officer”) hereby requires You to immediately:

- a) Self-quarantine and
- b) Follow all instructions in this Order.

INSTRUCTIONS

1. Self-Quarantine Until You’re Not at Risk for Spreading COVID-19

You must quarantine (stay in Your home or another residence) until You are no longer at risk for spreading COVID-19. Until this time, You may not leave Your place of quarantine or enter any other public or private place, except to receive necessary medical care or a test for COVID-19 (which is recommended for close contacts). However, if You are a healthcare worker or first responder who does not have symptoms (asymptomatic infection), You can follow the return-to-work protocols established by Your employer.

You are required to self-quarantine because it is likely that You have been exposed to COVID-19. If You’re infected, You can easily spread COVID-19 to others, including people who are at higher risk for serious illness, such as older adults and people with [underlying medical conditions](#).

If you have been exposed to COVID-19, you should consult with your healthcare provider.

Definition of Close Contact: For purposes of this Order, “close contact” is defined as any of the following people who were exposed to a person with a positive diagnostic (viral) COVID-19 test (“the case”) while they were infectious*:

- a) An individual who was within 6 feet of the case for a total of 15 minutes or more over a 24-hour period, or
- b) An individual who had unprotected contact with the case’s body fluids and/or secretions, for example, being coughed or sneezed on, sharing utensils or saliva, or providing care without using appropriate protective equipment.

- * A person with COVID-19 is considered to be infectious from 2 days before their symptoms first appeared until the time they are no longer required to be isolated (as described in "[Home Isolation Instructions for People with COVID-19](#)"). A person with a positive COVID-19 diagnostic (viral) test, but with no symptoms, is considered to be infectious 2 days before their first positive test was taken until 10 days after that test was taken.

Self-Quarantine Instructions: You are required to follow all directions in the "Home Quarantine Instructions for Close Contacts to COVID-19," which are available in [English](#), [Spanish](#), and [other languages](#).

Duration of Self-Quarantine: You are required to self-quarantine for 14 days after Your last contact with the person who has COVID-19. You must stay in quarantine for this entire 14-day period because this is how long it can take for symptoms and signs of COVID-19 to develop (incubation period). During this time, You could spread COVID-19, even if You don't have any symptoms or if You only have mild symptoms.

2. If You Develop Symptoms of COVID-19 and/or Receive a Positive (Viral) Diagnostic Test

If You develop any [signs and symptoms of COVID-19](#), You should contact Your healthcare provider, clinician advice line, or telemedicine provider for a medical assessment and discuss getting tested.

If You test positive for COVID-19, You must follow the Los Angeles County "[Public Health Emergency Isolation Order](#)" for COVID-19 and the "Home Isolation Instructions for People with COVID-19 Infection," which are available in [English](#), [Spanish](#), and [other languages](#).

If you test negative for COVID-19 or if you don't get tested for COVID-19, you must continue to self-quarantine for 14 days after Your last contact with the person who has COVID-19.

PURPOSE OF THE ORDER

The purpose of this Order is to help slow the spread of Coronavirus Disease 2019 (COVID-19), to protect individuals at higher risk, and to protect the health care system from a surge of cases into its emergency rooms and hospitals. California is in a State of Emergency because of the COVID-19 pandemic and COVID-19 is a substantial danger to the health of the public within the County of Los Angeles. The virus can easily spread between people who are in close contact with one another. Everyone is at risk for becoming ill, but some people are at higher risk for serious illness (including pneumonia or organ failure) or death due to their age, physical state, and/or health status.

This Order is based upon scientific evidence and best practices, as currently known and available. Isolation and quarantine are recommended by the Centers for Disease Control and Prevention (CDC) and other public health experts as a proven strategy for preventing transmission of COVID-19.

LEGAL AUTHORITY

This County of Los Angeles Health Officer Order is made under the authority California Health and Safety Code Sections 101040, 101085, 120175, 120215, 120220, and 120225. The Health Officer may take additional action(s), which may include civil detention or requiring one to stay at a health facility or other location, to protect the public's health if an individual who is subject to this Order violates or fails to comply with this Order. Violation of this Order is also a misdemeanor punishable by imprisonment, fine, or both.
